An agency can include both Talents and Official Hosts. They receive bonuses according to different charts. The agent earns a commission only from streamers who reach their monthly targets.

⚠️ **Special attention: Talent streamers are strictly prohibited from violating the behavior rules** (no adult content). Any violation may result in the loss of their Talent status and being transferred to Official Host conditions (*who are allowed to work with such content*).

Conditions for Activating the Agency Commission:

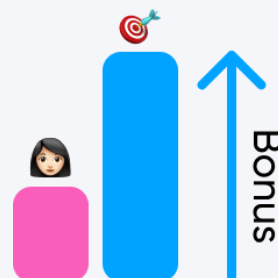

To activate the agency commission, there must be at least **3 streamers** in a calendar month who meet the monthly target for hours (**30 hours** in the public stream) and at least **10,000 diamonds**.

How the Agency Commission is Calculated:

To receive a **bonus**, the streamer must reach a **specific target** (the higher the target, the higher the bonus).

The agent receives a **commission** from the total amount of **diamonds** a streamer receives in a month.

Example of Calculation agency commission:

Let's assume the Official Host reaches **18,000** diamonds and Talent Streamer reaches **18,000** diamonds:

- The official host will receive a **\$10** bonus.
- The Talent Streamer will receive a **\$26** bonus.
- The agency commission will be calculated from the **36,000** diamonds.
- If the agency commission is **15%**, the calculation will be: $36,000 + 0.15 = 5,400$ 💎 (this will be the agency commission).
- If the agency has 5 more streamers reaching their targets, a higher commission of **30%** is activated, and then the agency commission will be: **10,800** 💎

It is important to understand that the more streamers in the agency who meet the targets, the higher the agency commission.
