For Tier 3 and **above**, agents must refer **new streamers** every month to maintain their commission level.

The **required** number of new streamers depends on the **tier** and must meet a **minimum** streamed time of **60** minutes per streamer across **any type** of stream (live, private, group, etc.).

If an agent **meets the earnings** threshold but fails to meet the recruitment target, their commission is adjusted as follows:

- **Option A:** The commission is adjusted downward to match the percentage corresponding to the number of streamers actually referred.
- **Option B:** The commission is adjusted one tier lower than the tier achieved by earnings.

It is important to understand that the more streamers in the agency who meet the targets, the higher the agency commission.
